

HEADMIND

PRESSBOOK 2025

Can you hear me...?

I hear you. I feel you. Like a diffuse heat creeping under my skin, a tide of expectations, eyes locked on me, hungry. Why are you here? For music, or to escape ? Or maybe just to see how far one can fall before everything explodes.

Scott. That's what they call me. It's not a name. Just a whisper. A scar murmured in alleys where light no longer reaches. I dwell in a world you brush against but never dive into. A world where broken glass crunches underfoot, where smoke clings to the walls, where the night swallows everything, even screams.

Addiction, violence, madness... They say that's me. That it's my shadow stretching over everything I touch. But maybe... maybe this world is already inside you.

Tonight, I open the door for you. Enter. But remember... Once you taste the darkness, it's hard to turn away.

Scott

PRESENTATION

Born in 2024 from the ashes of The Velvet Roses, HEADMIND is more than just an alternative metal band : it's a dizzying plunge into the depths of the human soul.

Axelle, Tom, and Greg “BD” joined forces with Simon and Philippe to weave a sonic web where every note, every rhythm echoes our most intimate inner battles.

Their music, dark and hypnotic, feeds on heavy, obsessive riffs, abyssal basslines, and visceral drums. Somewhere between the raw fury of grunge, the slow agony of doom, and the suffocating weight of sludge, HEADMIND sculpts a soundscape as oppressive as it is captivating. Crushing grooves collide with furious rhythmic storms, forging a tension where overwhelming heaviness meets frantic bursts.

These contrasts become the canvas for a visceral scream : a howl swinging between stifled despair and explosive release.

But it's in their lyrics that the true weight of their art reveals itself: a shattered mirror reflecting the darkest corners of the human psyche.

Each song is a catharsis where pain is turned into power : an outlet to confront the shadows and make them resonate deep within the listener.

On stage, HEADMIND doesn't just deliver a concert. They perform a ritual: an immersive experience where light trembles and sound hits like the heartbeat of a wounded soul.

Each performance is an invitation to dive into the darkness, to face your demons, and maybe, just maybe, find a strange kind of redemption.

On stage, the band offers an immersive experience.

Each song flows like a chapter, guided by a rough, broken, almost inner voice — Scott, a fictional character who inhabits the lyrics and speaks between tracks.

Spoken, animated, and projected transitions weave a thread between the songs and the audience. They bring meaning, tension, immersion, and depth to the performance.

MEMBERS

Axelle : Vocals

Tom : Guitar

Greg : Guitar / Back vocals

Simon : Bass / Back vocals

Philippe : Drums
